iCRAG 2019

Resources for a Sustainable Future

Monday 2nd December 2019

Croke Park, Jones' Rd, Drumcondra, Dublin 3

Poster Presentation Titles

HOST INSTITUTION

PARTNER INSTITUTIONS

FUNDED BY:

Table of Contents

Poster Titles:

Page:

SUPPLY OF RAW MATERIALS

1

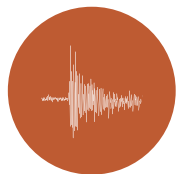

SECURE AND PROTECT GROUNDWATER RESOURCES

2

SAFEGUARDING THE GEOMARINE ENVIRONMENT

3

ENERGY SECURITY

4

PROTECTION FROM EARTH'S HAZARDS

5

PLATFORMS

6

PUBLIC PERCEPTION AND UNDERSTANDING
3D IRELAND
GEOCHEMISTRY
GEOPHYSICS

Supply of Raw Materials

No	Title	Author
1	Trace element study of sulfides from Irish Zn-Pb deposits: Potential vector towards mineralization	Aileen Doran
2	Seismic reflection imaging of the Irish crust using ambient noise autocorrelations	Clara Gómez-García
3	Lithium pegmatites in southeast Ireland: A storehouse for critical metals	David Kaeter
4	Aggregate Potential of Irish South Coast Offshore Palaeovalleys (AggrePOP): Preliminary Results	Evan O'Mahony
5	Hydrothermal Fluid Evolution in the Caribou VMS deposit, Bathurst Mining Camp, Canada: An example of LA-ICP-MS elemental mapping of pyrite	Foteini Drakou
6	Fingerprinting Volcanic Ash of the Irish Midlands	Hilde Koche
7	Geochemical paragenesis of pyrite associated with orogenic gold at Curraghinalt, Northern Ireland	James Stratford
8	Vein hosted Copper Deposits and Hydrothermal Processes of SW Ireland	Jüergen Lang
9	Geochemical halos as a tool for exploration of Irish-type Zn-Pb deposits	Lola Yesares
10	The Distribution of Energy Critical and Precious Metals at the Scale of a Porphyry Copper Deposit	Maurice Brodbeck
11	Tackling Sustainable Development Goal 13 via Dawsonite Precipitation	Niamh Faulkner
12	Irish offshore heavy mineral placer development and mineralogy	Siobhán Burke
13	Mapping the basement of Ireland through Sm-Nd and Pb isotopes (GSI Funded Project)	Steve Hollis
14	The application of machine learning methods to aggregate geochemistry predicts quarry source location: a case study from the Irish aggregate industry	Tadhg Dornan
15	Exploration and optimization of a novel negative carbon emission technology using enhanced plant mediated chemical weathering	Weimu Xu
16	The Re-Os Isotope System: Introduction, Applications, and Development	Danny Hnatyshin
17	Lower Carboniferous evolution of the southwest Irish Orefield	Eoin Dunlevy Paul Slezak
18	Host-rock stratigraphy, alteration and mineralization of Fishtie Cu-Co deposit, Zambia: Its application to regional exploration program	Subaru Tsuruoka
19	District Scale Industry Collaboration in Critical Element Exploration	Helen Twigg
20	Characterising Hydrothermal Alteration along the Rathdowney Trend, Ireland	Nick Vafeas

Secure and Protect Groundwater Resources

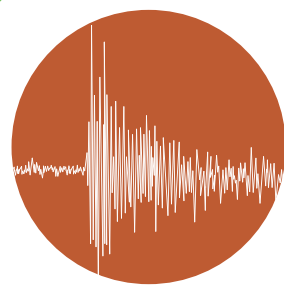

No	Title	Author
21	Arsenic Contamination of Fractured Bedrock Aquifers in the Palaeozoic Units of South East Ireland	Alex Russell
22	A spatial occurrence study on anticoccidial agrochemicals in Irish groundwaters	Damien Mooney
23	Ecosystem services provided by groundwater-dependent wetlands	Fabio Delle Grazie
24	Uranium sources in groundwaters within the Leinster Batholith, SE Ireland	Fani Papageorgiou
25	A new methodology for providing geological constraints on spatial variations in groundwater flow potential, as demonstrated in the fractured bedrocks of Ireland	John Paul Moore
26	Visualisation of flow and contaminant transport in karst aquifers	Léa Duran
27	Antimicrobial Resistance in Subsurface Environments	Luisa Andrade
28	The impact of on-site wastewater effluent on karst springs	Luka Vicinic
29	Spatiotemporal transients of water age determined with radium isotopes as a tool to assess the extent of vertical mixing in coastal systems	Maxime Savatier
30	Modelling diffuse groundwater recharge in Irish karst	Philip Schuler
31	Principal Component Mapping of Geochemistry Data –An Example Using TELLUS Data from the Border Region	Sean Wheeler
32	Engineered silver nanoparticle (Ag-NP) behaviour in small scale treatment plants and in sewage sludge amended soils	Viviana Bolaños Benítez

Safeguarding the Geomarine Environment

No	Title	Author
33	The Dynamics of Carbon Cycling in Coastal Waters: Dublin Bay	Daniel Kerr
34	Cold Water Corals: Environmental Stressors and Sea Temperature Proxies	Erica Krueger
35	Freshwater input magnitude and typology as a driver of Carbonate system variability in coastal seas	Maria Teresa Guerra
36	Challenging the assumption of stability: Assessing modes and variability of the AMOC during past warm climates	Megan Murphy O'Connor
37	Synergies between the Sentinel Satellites and the use of Bio-optical and Flow cytometric measurements for tracing surface slicks along the Irish Western Shelf	Monica Mullins

No	Title	Author
38	Organic matter distribution in Pennsylvanian hybrid event beds; implications for the carbon cycle	Arif Hussain
39	Using Enhanced Imaging Techniques To Derisk Potential Hydrocarbon Prospects	Brydon Lowney
40	Apatite fission track analysis by laser-ablation: A novel fast grain mapping approach using the map interrogation tool Monocle	Claire Ansberque
41	Distribution and composition of a multi-layered salt-prone stratigraphy and its influence on rift basin development; The Slyne and Erris basins, offshore NW Ireland	Conor O'Sullivan
42	Compression-based reservoir modelling conditioned to well data	Deirdre Walsh
43	Testing the impact of contrasting fault growth models on syn-rift stratigraphy using forward stratigraphic modelling	Eoin O'Donnell
44	Geometric and kinematic comparison of the Galicia Margin and the Porcupine Basin	Gaël Lymer
45	Full-waveform inversion and travel time tomography at Rockall Trough	Gaurav Tomar
46	Discrete numerical modelling of the evolution of fault systems in 3D	Janis Aleksans
47	Towards more realistic conceptual models of deep-water lobes: controls on NTG and amalgamation ratio	Javier López-Cabrera
48	The Role of Tectonic Evolution, Crustal Structure and Multiphase Magmatism in the Evolution of the Hatton Rifted Continental Margin, Offshore Ireland, Using Seismic Reflection and Potential Field Methods	Laura Berdi
49	A hierarchical compression based geomodelling workflow for Petrel	Marcus Carneiro
50	Provenance analysis of Irish Carboniferous sandstones: insights into sediment routing and paleoclimate	Martin Nauton-Fourteu
51	Provenance of Mesozoic sediments in the North Celtic Sea and St. George's Basin's: Exploring transition Fuels	Odhrán McCarthy
52	Thermochronological & Geochronological Results from the Goban Spur, offshore Ireland	Remi Rateau
53	Fault-bend folding associated with normal faults in Porcupine Basin	Stratos Delogkos
54	Controls on fault-related deformation in the Porcupine Basin, Ireland	Vincent Roche
55	Sand detachment mechanisms on the modern seafloor: A review of processes and examples	John Counts
56	Origin and significance of thin-bedded packets adjacent to channels in sandy deep-sea fan successions	Emma Morris

Protection From Earth's Hazards

No	Title	Author
57	Developing a New Toolkit for Imaging Irish Karst	Alex Braun
58	Development of a fibre-optic approach for offshore site investigation	Andrew Trafford
59	Reconstructing the depositional history of large landslide deposits on the Hikurangi margin, offshore New Zealand	Ben Couvin
60	Three Dimensional Modelling and WSN Monitoring of Dublin Port Tunnel	Chao Wang
61	Automated Crack Classification for Large-scale Tunnel Structure Using Deep Learning	Darragh O'Brien
62	Investigation of the link between stress, pore pressure, and slow slip earthquakes: implication for geohazard modelling	Effat Bebhoudi
63	Locating sub-surface Karst Conduit Waterflow using Ground Vibrations	Haleh Karbala Ali
64	Understanding the link between climate warming and increased volcanic eruptions: detecting Icelandic tephra and volcanic aerosols in peat	Lucy Blennerhassett
65	Geohazard Investigation in the Irish Sea using Seismic and Seabed Mapping Techniques	Mark Coughlan, Eoghan Daly
66	Implications of fluid migration, shallow gas and seepage in the north Irish Sea	Mark Coughlan, Roy Srikumar
67	Karst and the N6 Galway City Ring Road: Infrastructure for a Sustainable City and Community	Megan Dolan
68	In-Situ Slope Failure and Spoil Mass Failure on Upland Blanket Bogs: A Review of 20 years of Industry Data for Wind Farm Construction, combined with empirical testing of Case Study Test Sites	Eileen McCarthy

Enabling Methodologies iCRAG Platforms

No Title

Author

Public Perception and Understanding

70	Radon Risk Perception, Communication and Participative Decision-making	Gary Bradley
69	The Tephra Bag Experiment - Five steps for a successful citizen science project	Kamila Kwasniewska
71	The human side of geoscientists: comparing geoscientists' and non-geoscientists' cognitive and affective responses to geology	Anthea Lacchia
72	GeoPlan: A new engagement framework for decision making on coastal geohazards.	Daniel Tubridy
73	A Feat of Clay: Palaeontology Engagement through Art	Elsbeth Wallace
74	Purls of Wisdom: Getting to the knitty gritty of Ireland's changing climate	Elsbeth Wallace

3D Ireland

75	A detailed analysis of faulting in the Navan Area, NE Midlands, Ireland	John Conneally
76	Structural controls on base metal mineralization in the Irish Lower Carboniferous	Koen Torremans
77	The 'Blue Book' revamped: Towards a tectono-stratigraphic framework of the Tournaisian & Viséan of Ireland	Robert Doyle

Geochemistry

79	Laser-ablation isotope and trace element geochemistry for the iCRAG Energy Security and Supply of Raw Materials Challenges	Eszter Badenzski
----	--	------------------

Geophysics

78	3-D Magnetotelluric Assessment of the Geo-resources Potential of the Irish Crust	Duygu Kiyan
80	Receiver function imaging above an underground mine	Senad Subasic
81	GEO-URBAN: Preliminary Application of Passive Seismic and Electromagnetic Methods in Dublin City	Giuseppe Maggio
